

Prestoplan

ENVIRONMENTAL POLICY STATEMENT

Prestoplan Ltd is an ISO14001 accredited business, and acknowledges the impact of its activities on the environment in a number of ways:

1. The development and implementation of this policy is a commitment of Prestoplan Ltd's management and a shared responsibility with its employees.
2. Integrate environmental management into each aspect of our day to day business operation to ensure environmental issues are addressed.
3. To comply with environmental and health and safety laws and regulations, to the extent that practical implementation aims to exceed government requirements.
4. Seek to reduce wastage of national resources such as energy, water and raw materials, and maximise efficient use of such resources, reuse and recycle rather than dispose of such materials.
5. Ensure all employees have an understanding and are trained in their responsibilities in relation to the environmental policy and management system.
6. Ensure that suppliers and contractors minimise the impact of their operations on the environment and actively support our environmental programmes through an environmentally sound purchasing policy.
7. Monitor progress on a regular basis to identify strengths and areas for improvement and highlight actions required.
8. Environmental performance will be reported annually.

In particular, in order to implement this policy we will address a comprehensive set of objectives and targets identified as a result of our environmental review, which relate to our environmental impacts of our organisation.

We intend to reduce our environmental impacts through improvements in:

- Energy use.
- Waste reduction.
- Contamination management.
- Recycling.
- Business travel.
- Purchasing, particularly timber from sustainable sources.
- Staff training.
